About Company

Al Halabi company is full-service general contracting and metal fabrication company with extensive experience in delivering construction and industrial projects across various sectors.

We specialize in structural steel hangars, aluminum systems, iron works, kitchens, and architectural glass installations. From residential buildings to commercial facilities and industrial units, our team executes projects with a strong focus on quality, precision, and efficiency.

Our Vision

To become the region's preferred provider of industrial metalwork and contracting services through innovation, reliability, and sustainable practice.

Our Mission

To deliver high-quality engineering and construction services that combine efficiency, precision, and professionalism—always putting our clients' needs first.

Ceo Message

At Al Halabi Company, our journey began with a simple but powerful goal: to build a company rooted in quality, trust, and hard work. Over the years, we have grown steadily—earning the confidence of our clients and partners through dedication, professionalism, and a results-driven approach.

We believe that every project is more than just steel and concrete—it's a responsibility. Whether it's a structural steel hangar, a custom aluminum system, or a full-scale contracting job, we treat each assignment with the same level of care and attention to detail.

What sets us apart is not just our technical ability, but our commitment to delivering on time, maintaining transparency, and building long-term relationships. We are proud of the team we've built and the milestones we've achieved, but we're even more excited about the future.

Thank you
Warm regards,

Amer Al Halabi

How We Work

At Al Halabi Company, every project begins with a clear understanding of the client's goals, technical requirements, and timeline. Through initial consultations, site visits, and reviews of architectural or engineering plans, we define the full project scope and align on expectations. Our planning stage ensures that each detail is accounted for before execution begins.

Once the scope is confirmed, our in-house team proceeds with technical design, material selection, and fabrication. We work with high-quality, certified materials and use advanced machinery to ensure structural precision and durability. From structural steel to aluminum systems and custom metalworks, all components are crafted under strict quality control measures within our facilities.

The final stage involves on-site execution, installation, and final inspection. Our experienced crews manage each step with a focus on safety, efficiency, and coordination with other contractors. Before handing over the project, we conduct a thorough quality assurance process to ensure full client satisfaction and long-term performance.

Our Service Company

At Al Halabi Company, we provide comprehensive general contracting solutions tailored to meet the diverse needs of residential, commercial, and industrial clients. Our expertise spans turnkey construction projects, including residential and commercial buildings, concrete and structural works, as well as site development and earthworks.

We specialize in the design, fabrication, and installation of structural steel hangars, warehouses, and industrial sheds. Our custom iron fabrication services cover gates, railings, and decorative steel elements, crafted with precision to meet specific client requirements.

Our aluminum and glass works include curtain wall systems, cladding, frameless glass curtains, skylights, balustrades, and glass canopies—combining aesthetics with durability and modern design standards.

Additionally, we offer modular aluminum and wood kitchens for both residential and commercial applications. This k

Our rank

We also provide specialized doors, windows, and office partitions to enhance the functionality and appearance of your spaces.

Our Service

Individual

At Al Halabi Company, we understand that every project is unique and sometimes requires specialized, standalone services. Our individual services allow clients the flexibility to select specific solutions tailored to their exact needs without committing to a full package.

Whether you need custom metal fabrication, aluminum kitchen installations, steel structural components, or interior finishing works, our team is ready to deliver precise, high-quality results on time.

Each service is carried out with the same dedication to quality, safety, and professionalism that defines all our projects. This approach ensures that clients can engage us for single services or combine multiple offerings according to their project requirements.

CONTRACTING

How It Works

Project Details 01

Steel Structure: Designed and installed using advanced engineering techniques, adhering to international standards to ensure maximum strength and structural integrity.

Our team carried out precise welding and assembly to guarantee safety and longevity.

Concrete and Foundations: Implemented advanced concrete works, including pouring robust foundations capable of supporting the heavy steel framework, as well as concrete flooring engineered for heavy-duty use and long-lasting performance.

Project Details 02

Aluminum and Glass Facades: Professionally installed aluminum and glass facades using high-quality materials to ensure thermal and acoustic insulation, while providing a modern and elegant exterior appearance.

Office Fit-Out: The project included comprehensive office finishing works such as interior partitioning, painting, suspended ceilings, lighting, and electrical installations, all tailored to create a functional and comfortable working environment.

Safety and Security Systems: Installed advanced security systems including surveillance cameras, alarm devices, and fire protection systems to guarantee a safe and secure workplace.

Our Project

Agricultural
Greenhouses

Agricultural Greenhouses: The Optimal Solution for Sustainable and Advanced Farming

At our metals and contracting company, we provide comprehensive and innovative solutions in the design, manufacturing, and installation of agricultural greenhouses. Our greenhouses create the ideal environment to boost crop production and enhance quality.

AL HALABI FOR
STEEL AND
CONTRACTING

Project Details 01

Our Greenhouse Services Include:

- **Comprehensive Engineering Design:** Our engineering team customizes greenhouse designs tailored to client needs, considering local climate factors and crop requirements.
- **High-Quality Manufacturing:** We use premium corrosion-resistant metals and advanced agricultural-grade plastic films to ensure durability and longevity.
- **Professional Installation:** We deliver precise and efficient installation services that guarantee structural stability while adhering to safety and quality standards.
- **Maintenance and Technical Support:** Regular maintenance and expert technical support ensure continuous optimal performance of the greenhouses.

How It Works

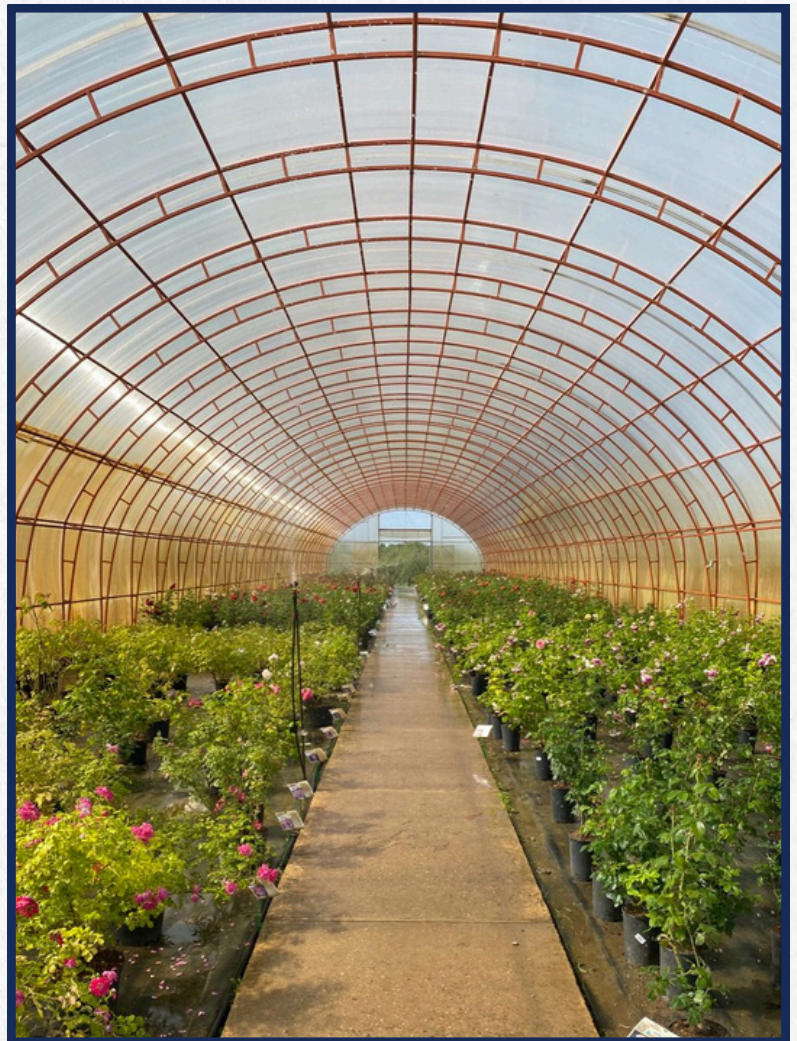

AL HALABI FOR
STEEL AND

Project Details 02

Our Comprehensive
Restoration Process:

- **Thorough Inspection:** Utilizing advanced non-destructive testing methods to assess the condition and identify weak points.
- **Rust and Damage Removal:** Complete cleaning and preparation to ensure strong adhesion of restoration materials.
- **Reconstruction of Damaged Sections:** Applying state-of-the-art materials and techniques to reinforce and strengthen the structure.
- **Protective Coatings:** Applying high-performance protective layers to guard against rust, corrosion, and environmental wear, significantly extending lifespan.

How It Works

Our Project

Outdoor
Panoramic
Elevator Tower

Best Fit for Your Elevator Tower Project

As part of the El Mirador project located in El Minieh with breathtaking views overlooking the Mediterranean, our company was commissioned to design and execute a unique outdoor panoramic elevator tower. The goal was to create a fully functional and aesthetically pleasing vertical transport system that enhances guest experience while integrating seamlessly with the mountainous surroundings.

AL HALABI FOR
STEEL AND
CONTRACTING

Project Details 01

- **Structural & Civil Works:** Complete excavation and concrete base foundation work in challenging mountainous terrain. Construction of the vertical elevator shaft structure using reinforced concrete and steel supports. Installation of cylindrical vertical columns with top framing to support the roof and pulley system.

- **Architectural & Exterior Design:** Full cladding of the shaft using tempered glass panels for a panoramic experience. Integration of a custom-designed metal entrance door with artistic ironwork and insulation. Finishing the top section with a Mediterranean-style red-tile roof for aesthetic consistency with the restaurant's theme.

How It Works

Project Details 02

- **Mechanical & Lift System Installation:** Supply and installation of a vertical outdoor lift system designed to operate efficiently in an open-air environment.

Installation of the motor and pulley system on the upper level with weather protection. Coordination with lift suppliers to ensure safety, performance, and weather durability.

- **Electrical & Lighting Systems:** Internal wiring for lift power and control systems. Installation of external and internal lighting fixtures for visibility and aesthetics at night.

Integration of emergency systems and controls.

- **Safety & Accessibility:** Reinforced safety features including glass panels with high wind resistance. Secure anchoring and access stairs during construction and future maintenance. Ground-level access designed to accommodate visitors of all ages.

How It Works

AL HALABI FOR STEEL AND CONTRACTING

Project Significance:

- Panoramic Design: Full glass shaft for a 360-degree view of the surrounding landscape.
- Tailored Aesthetic: Custom-built roof and door details to match the architectural identity of El Mirador.
- Durability: Built to withstand outdoor environmental conditions (wind, rain, UV).
- Complete Execution: From concept design to final handover — fully delivered by our team.

Sliding Doors for
Commercial
Stores

Sliding Doors for Commercial Stores

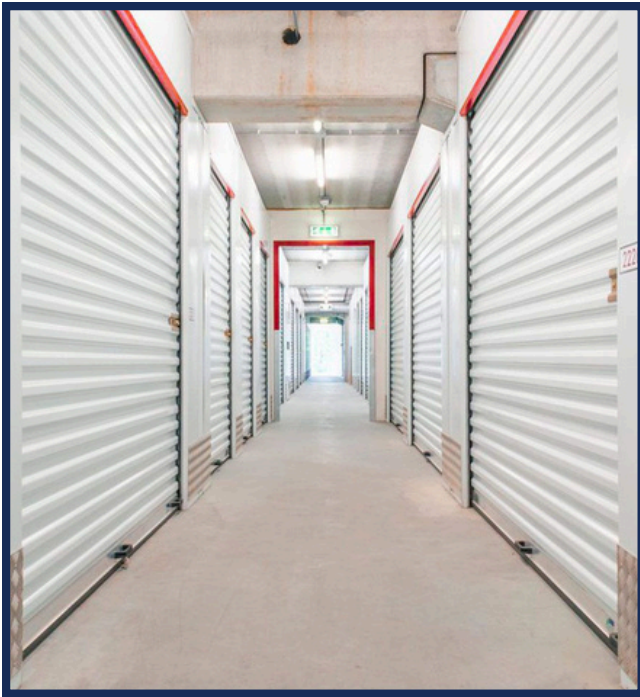

At our company, we specialize in providing innovative and practical sliding door solutions tailored for commercial establishments. Our doors combine architectural elegance with structural strength, offering your storefront a sophisticated look with the highest standards of safety and functionality.

AL HALABI FOR
STEEL AND
CONTRACTING

Key Features of Our Sliding Doors

- **Material:** Crafted from premium-grade metals resistant to weather and corrosion, with multiple finish options including stainless steel, powder-coated aluminum, or custom thermal paint.
- **Mechanism:** Smooth sliding system using high-quality industrial rollers, ensuring silent and effortless operation.
- **Security:** Equipped with advanced locking systems, with optional add-ons such as remote control access, motion sensors, and automatic closing mechanisms.
- **Design Flexibility:** Customizable configurations to fit any façade dimensions. Options available include tempered glass, reflective glass, or full metal panels to match your business identity.
- **Maintenance:** Smart engineering for easy maintenance and extended product lifespan.

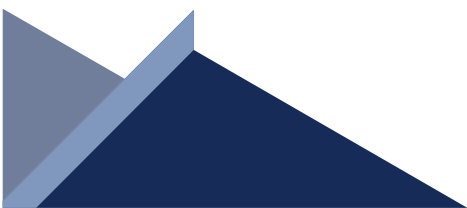

AL HALABI FOR
STEEL AND
CONTRACTING

Why Choose Our Doors?

- Space-saving design through lateral opening
- Elegant upgrade for any commercial storefront
- Enhanced thermal and acoustic insulation
- Fast installation & excellent after-sales support

Iron Works
Section

Where Strength Meets Elegance

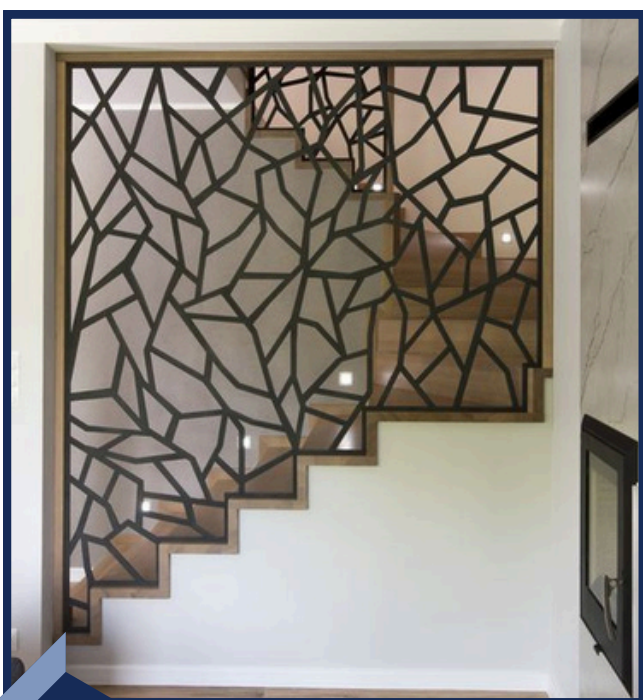

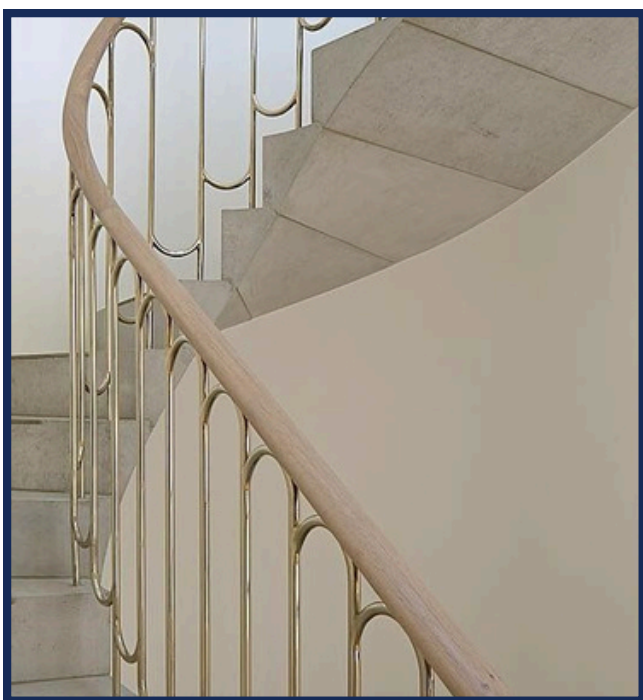

At our company, iron is not just a construction material—it is a design language that speaks of elegance, sophistication, and precision craftsmanship. We execute all types of ironwork with a perfect balance of structural strength and artistic finesse, transforming every element into a visual signature of the space—residential or commercial.

AL HALABI FOR
STEEL AND
CONTRACTING

Where Strength Meets Elegance

- **Balcony and Staircase Railings:** We design and manufacture iron railings that combine stability and refined style, ranging from timeless classical designs to clean, modern aesthetics. Advanced techniques ensure durability, safety, and harmony with your architectural vision.
- **Windows and iron :** We offer fully customized security solutions for windows and entrances using robust, decorative iron designs.
- Our range includes protective grilles, main gates, exterior doors, and tailored wrought ironwork for all needs.
- **Wrought Iron Décor and Artistic Features** We turn iron into art—luxurious gates, decorative canopies, patterned facades, ornate columns, and garden ironwork.
- Each piece is crafted with precision and designed to seamlessly integrate beauty with functionality.

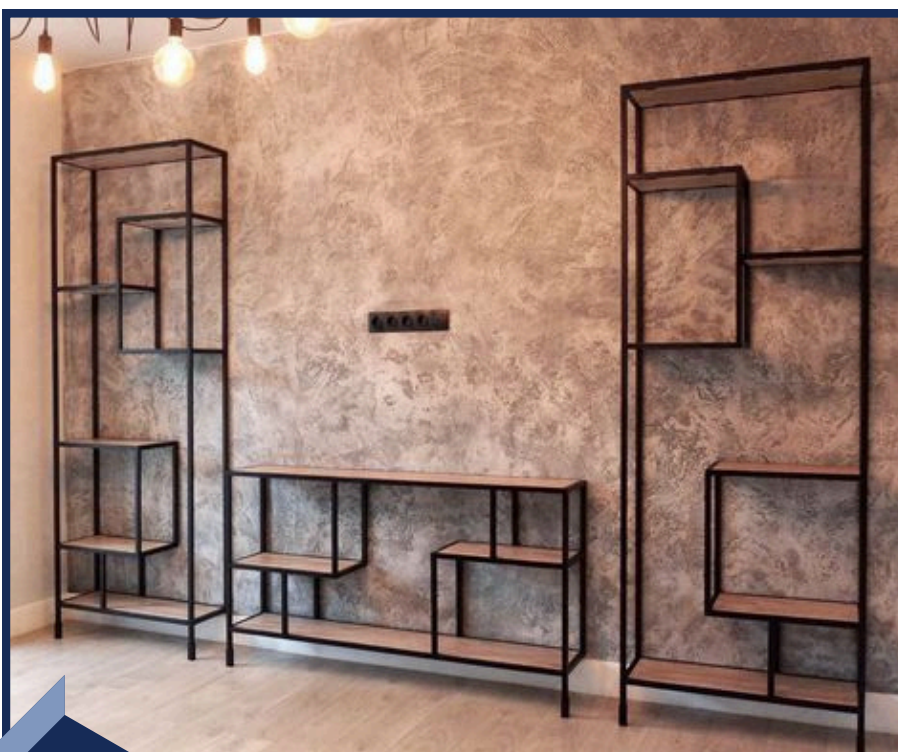

AL HALABI FOR
STEEL AND
CONTRACTING

Where Strength Meets Elegance

- Custom Design & Execution
We listen carefully to our clients' needs and deliver unique, made-to-order creations. Every project meets the highest standards of quality and is delivered on schedule, with meticulous attention to detail—technically and aesthetically.

Aluminum
Windows & Doors

Premium Aluminum Systems

We provide high-quality aluminum windows and doors tailored to your needs. Our products combine durability, modern design, and excellent thermal and acoustic insulation. Available in various colors and custom sizes to perfectly fit your project.

AL HALABI FOR
STEEL AND
CONTRACTING

Custom Aluminum Windows & Doors

Premium Aluminum Profiles

- We use high-quality aluminum specifically engineered to withstand harsh weather conditions. Our profiles are strong, corrosion-resistant, and lightweight, ensuring easy installation and long-lasting durability.

Profile Types:

- Thermally Broken Profiles: Designed to reduce heat transfer and improve thermal insulation.
- Standard Profiles: Suitable for areas where thermal insulation is not critical.

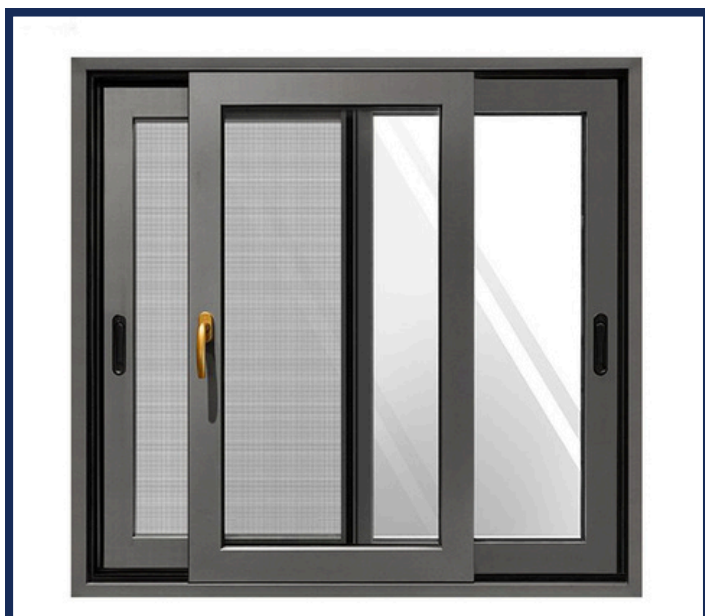

Materials & Finishes:

- Aluminum profiles are available in a variety of colors with Anodized or Powder Coating finishes for superior scratch and corrosion resistance.
- Available colors include White, Coffee, Black, Gray, and custom colors (RAL).

AL HALABI FOR
STEEL AND
CONTRACTING

Custom Aluminum Windows & Doors

Window Types

- Sliding Windows: Smooth and easy to operate, perfect for saving space.
- Tilt & Turn Windows: Offer safe ventilation and full control over opening.
- Fixed Windows: Non-opening, ideal for natural light while maintaining sleek design.
- Panoramic Windows: Large glass areas with full or partial opening options, with high resistance.

AL HALABI FOR
STEEL AND
CONTRACTING

Custom Aluminum Windows & Doors

Door Types

- Sliding Doors: Space-saving and smooth operation, ideal for patios and entrances.
- Swing Doors: Robust design with high-quality hinges and multi-point locking systems.
- Folding Doors: Allow full opening of the space, perfect for restaurants and villas.
- Entry Doors: Custom designs with options for safety glass and decorative elements.

Our Project

Why Choose Our
Sandwich Panel
Units?

Innovative Solutions in Prefabricated Housing

Our company offers high-quality prefabricated buildings made of sandwich panels, designed to meet various on-site and residential needs — from security cabins and site offices to temporary or permanent housing — thanks to their practical design, fast installation, and excellent insulation properties.

AL HALABI FOR STEEL AND CONTRACTING

General Specifications:

- **Exterior Structure:**

Made of weather-resistant sandwich panels, with customizable color and exterior finishing.

- **Thermal & Sound Insulation:**

High-performance insulation using PU (Polyurethane) or EPS (Expanded Polystyrene) core.

- **Doors & Windows:**

Metal or PVC doors, and double-glazed windows for enhanced insulation.

- **Metal Frame:**

Galvanized steel structure resistant to corrosion and rust.

- **Roofing:**

Fully insulated and waterproof, adaptable to various climates.

- **Common Applications:**

1. Security cabins
2. Temporary offices
3. Labor housing
4. Mobile toilets
5. Temporary storage rooms

Our Project

Roof Tiles

Strength Meets Style in Architectural Finishing

At our company, we take pride in delivering high-quality, durable construction solutions with an eye for elegance and design. Among our key offerings is roof tiling (Qarmid) – a classic and practical choice for roof finishes that offers both aesthetic appeal and long-term performance.

Types of Roof Tiles We Offer

Our diverse selection of roof tiles ensures the perfect fit for any project:

1. Clay Roof Tiles

- Made from natural clay and kiln-fired at high temperatures.
- Known for their timeless red-earth color and traditional look.
- Long-lasting and highly resistant to harsh weather.

2. Concrete Roof Tiles

- Produced from a mix of cement, sand, and water.
- Molded into various shapes and available in different finishes.
- Durable and cost-effective alternative to clay tiles.

3. Metal Roof Tiles

- Constructed from lightweight metal sheets (such as galvanized steel or aluminum).
- Coated for rust resistance and thermal insulation.
- Ideal for large roof spans and windy regions.

4. Synthetic or Plastic Roof Tiles

- Made from advanced plastic materials.
- Lightweight and easy to install.
- Water-resistant and unaffected by humidity or salt.
